

Reduced Environmental Impact

CF Stinson is committed to offering innovative earth-friendly products. Products that have earned our Reduced Environmental Impact designation are produced of the following fibers or materials:

- 100% recycled fiber, or
- 100% bio-based fiber, or
- 100% heavy metal free fiber, or
- 100% natural, compostable fiber, or
- PVC free

Our commitment to the environment extends beyond the products we offer. The industry-leading tools available at cfstinson.com continue to make the selection and sampling of commercial textiles more fun, more efficient, and more ecologically friendly.

Our customers are active partners in our green initiatives. By browsing and searching for the samples that you need on-line, you help prevent more than twenty thousand pounds of sample materials from entering the solid waste stream annually. CF Stinson has made it easier and "greener" than ever to source the fabrics you are looking for – whatever industry you're in, wherever you are.
