

LEED for New Construction & Major Renovations LEED-NC, Version 2.2

Activewerks has a broad commitment to environmental stewardship. Our furniture is manufactured using recycled and recyclable materials that can help customers meet environmental standards in their projects and buildings, including the US Green Building Council's Leadership in Energy and Environmental Design (LEED) Certification process.

For customers wishing to maximize the number and impact of LEED credits accumulated by their office furnishings, Activewerks' "Studio" design modification process enables the cost-effective development of specialized solutions incorporating certified, rapidly renewable, low emitting raw materials with the highest percentage of recycled content available today.

In the listing below, **green** checks indicate where standard Activewerks product can be applied toward credits under the LEED for New Construction & Major Renovations certification checklist. **Yellow** checks indicate areas where Studio modifications support criterion credits.

Materials & Resources

MRc 2.1 - Construction Waste Management, Divert 50% from Disposal

Activewerks Product Status: [✓] Activewerks products are protected during shipping with reusable wood pallets and blankets that are returned to the factory or retained by the delivery company. *Blanket wrap shipping program is documented on page 31 of Activewerks Price List (November 2007).*

MRc 2.2 - Construction Waste Management, Divert 75% from Disposal

Activewerks Product Status: [✓] Activewerks products are protected during shipping with reusable wood pallets and blankets that are returned to the factory or retained by the delivery company. *Blanket wrap shipping program is documented on page 31 of Activewerks Price List (November 2007).*

MRc 3.1 - Materials Reuse, 5%

Activewerks Product Status: [✓] An essential element of Activewerks product design is the inherent durability and flexibility of our furniture. In addition, our lifetime warranty on all non-electrical components guarantees a prolonged life cycle, facilitates re-use, and conserves the resources normally required for replacement. *Warranty terms & conditions are documented on page 31 of the Activewerks Price List (November 2007).*

MRc 3.2 - Materials Reuse, 10%

Activewerks Product Status: [✓] An essential element of Activewerks product design is the inherent durability and flexibility of our furniture. In addition, our lifetime warranty on all non-electrical components guarantees a prolonged life cycle, facilitates re-use, and conserves the resources normally required for replacement. *Warranty terms & conditions are documented on page 31 of the Activewerks Price List (November 2007).*

MRc 4.1 - Recycled Content, 10% (post-consumer + ½ pre-consumer)

Activewerks Product Status: [✓] Typical Activewerks desks and storage components contain more than 80% recycled content (approximately 10-15% post-consumer).

MRc 4.2 - Recycled Content, 20% (post-consumer + ½ pre-consumer)

Activewerks Product Status: [✓] Typical Activewerks desks and storage components contain more than 80% recycled content (approximately 10-15% post-consumer).

MRc 5.1 -Regional Materials, 10% Extracted, Processed & Manufactured Regionally

Activewerks Product Status: [✓] Our manufacturing facility & local suppliers may help qualify for this credit if they are located within the required radius of 500 miles from the project site.

MRc 5.2 - Regional Materials, 20% Extracted, Processed & Manufactured Regionally

Activewerks Product Status: [✓] Our manufacturing facility & local suppliers may help qualify for this credit if they are located within the required radius of 500 miles from the project site.

MRc 6 - Rapidly Renewable Materials

Activewerks Product Status: [✓] Via the Studio design modification process and/or the Activewerks COM program, Activewerks customers may specify substrate materials that meet this criterion.

MRc 7 - Certified Wood

Activewerks Product Status: [✓] All Activewerks board suppliers participate in the *Sustainable Forest Initiative* and also supply material certified by the Forest Stewardship Council. Activewerks customers may specify FSC certified substrate materials that meet this criterion through the COM program.

Innovation & Design

IDc 1.1 - 1.4 - Innovation in Design

Activewerks Product Status: [✓] Design teams are eligible for up to four innovation credits for exceptional performance above the requirements set by the LEED System. Via the Studio design modification process and/or the Activewerks COM program, customers may specify materials that meet the "Design Intent" requirement set forth in this credit.
